AUM Library
Annual Report

June 1, 2008 – May 31, 2009

Submitted by Rickey Best, Dean

Executive Summary

This year has been a challenge for the library. The slowdown in the economy has affected the University, and we have been actively preparing scenarios for budget reductions ranging from 4.5% to 13.5%. Each percentage point reflects approximately \$22,000 in reduced funding for the library.

In spite of the economic challenges, the library received some good news: two of our librarians, Barbara Hightower (Library Instruction) and Jason Kneip (Archives & Special Collections) received tenure, which will become effective October 1st, 2009. Additionally, the Library was able to deploy a new interlibrary loan system that will speed up the inputting of requests by students and faculty. Illiad will no longer require the re-keying of identification numbers. In an effort to be more cost efficient, the library is looking at no longer providing print copies of articles that are received electronically. Instead, these articles will be posted electronically and the user will be given a site from which they can retrieve their document(s).

Through the support of the Vice Chancellor for Academic & Student Affairs, the Library has received funding to implement a new catalog interface. WorldCat Local, a product from the Online Computer Library Center, provides the user an interface that will retrieve information from not only the library's catalog, but also articles and other media items which are available through databases the library subscribes to. Though article access will not be fully implemented until sometime in November, the Library has implemented the WorldCat (<http://aum.worldcat.org>) interface and has received a number of positive comments from faculty and students already. In order to enhance the searching ability of the library database, the Library is considering purchasing tables-of-contents enhancement from a vendor.

Among the highlights from this year's report, while the actual Gate Count in the Library increased by 4%, the actual number of face to face assistance transactions in Reference decreased. Some areas, such as Government Documents and Archives and Special Collections saw increases in patron use and questions asked. Overall, the circulation of library materials was static, declining by 1%, though circulations in the Nursing collection saw an increase of 62% and that of physical education saw an increase of 51%.

Student and faculty use of the library's interlibrary loan service saw an overall decline of 28.7% in the number of items requested by our faculty and students. This reflects basic satisfaction with the library and its resources. By the same token, other libraries requested fewer items from us (-7.4%) than during the previous year. The economy, however, will more than likely dictate greater use of interlibrary loan next year as the library will be investigating cuts to its serials subscriptions to cope with reduced funding. Overall, the Library lent 88% more items than we borrowed (1,994 lent vs. 1,059 borrowed).

Our electronic presence, however, continued to grow. This year the library homepage saw a total of 3,646,529 hits, with a total of 1,434,638 total pages viewed. A total of 288,406 visitors to the site were recorded, each of whom utilized a library resource. The largest traffic time for web use of the library was between 2:00 p.m. and 2:59 p.m., with Tuesdays seeing the most web traffic.

Because of a decision made early in the year to attempt to protect the serials and database subscriptions, the Library purchased fewer monographic and video titles for addition to the collection. Overall, these additions were down by 24% from the preceding year.

As a regional depository for the Federal Government, the Library's the lack of a qualified librarian to manage and operate the repository and documents collection places a severe strain on already limited staffing. As a regional depository, the AUM Library is responsible for supervising and coordinating the actions of selective depository libraries in central and southern Alabama, visiting them and evaluating their compliance with Government Printing Office and Depository Library regulations, as well as approving those libraries disposal of government publications. Although short staffed, the Government Documents area did see an increase in use of materials

Goals and Challenges

The Library continues to face a number of serious challenges in terms of staffing. At present, the greatest need is for a Government Documents Librarian and a Serials/Electronic Resources Librarian. In comparing the AUM Library staffing with those of Master's Level I institutions (a total of 488 institutions), the National Council on Education Statistics reports that the Comparison Group average to be 10.96 librarians, compared to AUM's 9.0. The Comparison group has an average of 2.57 librarians and other professional staff per 1,000 students, compared to AUM's 2.41. (Note: This comparison comes from the NCES Library Comparison database, <http://nces.ed.gov/surveys/libraries/compare/ReportComparisonGroup.asp>, using 2008 data.

In addition to staffing, the Library will need to continuously review its expenses for journals and databases. The library has already prepared one budget cut, and will soon be completing a

second cut. With these proposed cuts, the Library will reduce its database and serials expenditures by approximately \$120,000. Even with this, however, the Library will face an increase of an estimated 8% for serials expenses in the coming year. The Library will no longer be able to retain a print subscription to a title if it is available electronically.

The Library will complete a new five year plan by the end of December, and have it in place starting January 1st, 2010.

In continuing its efforts for institutional effectiveness, the Library will participate in the LibQual+ user satisfaction survey, sponsored by the Association of Research Libraries, in 2010. The Library will participate along with five other Alabama academic libraries, and will thus gain a comparison of the quality of our services with those offered by our sister institutions.

The Library will complete deployment of the WorldCat Local platform, and integrate the “federated” searching module within the software across all of the databases to which the library subscribes, allowing users to locate books and journal articles with a single search.

The Library will continue to work with the faculty and students to ensure that the research and teaching needs of the institution are met.

Annual report, Library Automation, AY 2008-2009

Submitted by Timothy P. Bailey, Systems Librarian

Summary outline:

Records in Voyager:

- Bib count: 613102 unsuppressed records; 9689 suppressed
- Item count: 303120 unsuppressed records; 381 suppressed
- Holdings count: 614664 unsuppressed records; 11172 suppressed

Voyager

- Access reports
- Search logs
- Problems with AU firewall
- Upgrade to 7.0.3 (Dec. 2008)
- Move of the video/DVD collection to Reference
- Began circulating headphones from the Reference Desk
- Editing of the various electronic resources in the catalog to accommodate off campus access

access

- Continued addition of netLibrary and gpo records
- Running patron purge functions, Summer 2008

Database (non-Voyager) maintenance

- Updated EZProxy

- Established LDAP for authentication
 - Coordination with School of Nursing and the “AUM-at-AU” program to provide cross enrolled students access
 - Received 320 e-mails regarding problems logging in to the databases from off campus
 - worked with Darryl Woods and Barbara Hightower to restore access to databases lost during the December break website re-deploy
 - Worked with Barbara Hightower and Public Services on deploying new database subject pages.
 - Database cuts due to proration and a few additions were made.

Other activities

- ILLIAD
 - Lending tested and deployed, Summer 2008
 - Borrowing is set up and ready to be deployed; users will log in via LDAP using AUM e- mail credentials
 - Odyssey component for article/document delivery is being set up to work in conjunction with ARIEL
- WorldCat Local
 - system has been configured to accommodate interfacing with the Voyager OPAC to determine item status and return information.
 - “Tiering” has been set up to account for the MALCat libraries
 - Webinars regarding set up and self-configuration attended
 - Records cleanup and minor tweaking to the interface need to be accomplished.

Annual Report Narrative:

According to the Library Mission Statement (<http://aumnicat.aum.edu/libinfo/mission.html>) the AUM Library “provides access to information resources to support the curriculum and research needs of AUM’s students, faculty and staff.” The Automation department does this directly, by providing access to our many electronic resources, including databases, searchable indexes, and the online catalog, and indirectly by providing access to data on the use of these resources to the Library for collection development purposes. Access to the electronic resources is provided for both on campus and off campus users, and this access is in continuous development.

During the 2008-2009 year for the Automation department at the AUM Library continued to maintain a high-level of workload. With the continued addition of numerous electronic bibliographic records, the number of records in the OPAC has grown to 613102 unsuppressed bibliographic records, with 9689 suppressed bibliographic records in the catalog as well as of 6/30/2009. There are 303120 unsuppressed item records, and 381 suppressed item records. There are 614664 unsuppressed holdings records, with 11172 suppressed records.

Among the regular duties of the Automation department are using the functions of Voyager to provide data for use in the collection development process. These functions included setting up Access Reports that pulled detailed information about purchases, invoices, and line items, which will be especially useful during auditing. Other new statistics pulled include the setup of the OPAC search logging functions. This search logging allows the retrieval of data including the number of searches run during a given time period (138147 searches done during the 2008-2009 AY), the search strings, and the internet IP address of the system running searches. This search log has been problematic in the past, because Voyager is normally set to not log search activity; when Voyager is updated by Auburn, it is incumbent on the Systems Librarian to go in and set the search logging to on; the default setting is due to the large amount of space search logging can take up on the servers. In addition, while working with Access Reports in late Spring, it was discovered that security settings in the Auburn campus firewall had been set such that Access Reporting for the AUM Library failed. This problem was reported to Jon Bell at AU and resolved.

Voyager was upgraded over the December break, as per usual. The Auburn and AUM Libraries are now running version 7.0.3 of the Voyager ILS. This upgrade included a new interface for the OPAC, named "tomcat." This interface has not yet been deployed by Auburn; while work continues at the main campus on the deployment of the new interface, the Automation Department at AUM has decided to wait until Auburn has the kinks worked out before addressing that issue.

Other routine Voyager work included changing the OPAC display for the media/video/dvd collections, to reflect the move from the 2nd floor storage area to the 2nd floor shelves across from the reference desk. The checkout of headphones and games was set up at the suggestion of Ms. Lucy Farrow, Head of Public Services. While the games project has not gotten very far, the headphones have been circulating regularly, with 179 circulations of headphones between September 2008 and May 2009.

Electronic records continued to be added to the catalog, and many of the existing records needed correction for changes to the vendor name, URLs, and for cataloging consistency. Chief among these were the netLibrary records, the Humanities E-Book, and the U.S Congressional Serials set. The greatest need was for the 856 fields of these records to be proxied for off campus access; this was a fundamental need for the "AUM at AU" program students, who are attending Auburn University Montgomery while living in Auburn. Additionally, the ACLS Humanities E-Book records needed correction due to changes in the URLs and a change to the collection name. In order to do this, new records were downloaded from the vendors, and edited using Strawn's Cataloguing Toolkit, a free set of tools for opening, editing, and creating MARC records. Work remains to be done on configuring the EZProxy service to handle netLibrary records in the OCLC approved manner, but access to these records for off campus users has been established.

Records continued to be added to Voyager for both the internet and government documents locations. These records included the final set of netLibrary 7 records as well as the U.S. Congressional Serials Set. 55860 records were added to the "internet" location, and 20779

records were added to the “gpo” location. The number of records added to “gpo” increased over last year, while the records added to the location “internet” decreased. Additionally, 436 records were sent via EDI to Baker & Taylor; work continues with Ms. Diane Westfall in Acquisitions on setting up EDI to receive data from Baker & Taylor, rather than just sending purchase orders. Ms. Westfall has also asked that she be allowed to do the file transfers from the Voyager server to the Baker & Taylor EDI site, which will need to be set up by Jon Bell at Auburn.

In Summer 2008, the patron purge function was first run. This process allows the deletion of patrons who are no longer attending AUM and who have not been active within three years. The deletion of patrons with historic fines was not enabled, allowing the recovery of that data should it be needed. This process is not run continuously, as the need is not pressing. However, it will be run during the Summer 2009 break.

In non-Voyager related work, maintenance of and providing access to the AUM Library’s databases has continued to be a source of the majority of tasks. One of the first of these tasks involved upgrading the EZProxy software which handles the authentication of patrons for off-campus access to the Library’s databases. EZProxy is now running version 5.0c, and a normally planned upgrade will take place in late summer 2009, prior to the start of Fall semester. Working with Dale Wynn of IT Services and Larry Brumby of the Library, an alternative login scheme, using LDAP (Light Duty Access Protocol) to query the campus e-mail servers has been tested and deployed as well. This will allow users to access our resources using their AUM e-mail credentials, rather than the last name/library barcode combination used in the past. At the present time, both methods are available for logging in, but the change for most users should take place beginning in Fall 2009. Work continues with Public Services, the “AUM-at-AU” program, and the School of Nursing to provide access to resources for students who are cross-enrolled at both campuses. Because IT Services does not normally provide these students with e-mail accounts and Senator IDs, access for these patrons requires coordination with the appropriate Auburn campus contacts for the establishment of access credentials. This is handled by putting these patrons in the authentication system as a group, using their last name and their Auburn student ID for logging in. Ms. Amanda Morris, the AUM-at-AU facilitator for the Library was provided access in a similar manner. The Automation department received 320 e-mails regarding problems with logging in. It is hoped that by moving as many of our patrons to the AUM e-mail credential based logins these problems can be avoided, as the major reason appears to be a simple misunderstanding of how the library barcode is structured. Patrons also contacted the Automation department by phone regarding these problems, though the number is not recorded.

Maintenance of the online databases was also a high priority for the Automation department. During the December break, Mr. Darryl Woods, the AUM Library’s web manager, updated the site to reflect more closely the anticipated changes to the main AUM website. These changes required that the URLs for the databases be checked and corrected due to inconsistency between the pages Mr. Woods created and the current URLs for a number of databases. Working with Mr. Woods and Ms. Barbara Hightower, these inconsistencies were noted and corrected. An ongoing project with Ms. Hightower extends the changes of the new revision to

the database subject pages. That project, which involves the library liaisons and the subject librarians, will take the subject areas now extant on the database pages and expand them, such that each database subject will be more concise and consistent with what it is thought the users are expecting to see.

Due to proration, several databases have been dropped, as determined by criticality to support the curriculum and usage by patrons. The number of databases listed on the library's databases by alphabetic order page is now at 124 unique databases (some databases are listed more than once, due to title changes and independently searchable sub-sections). There are also 173 resources now being proxied, a rise from the 2007-2008 year count of 150 resources. These resources include databases, electronic journals, electronic monograph collections and websites. Among the resources added to the database list are GreenFile from EBSCOHost, CultureGrams, and the Homeland Security Digital Library. Databases that have been dropped include ICPSR; the various Poem-, Story-, Essay-, and Speech-Finder products (now bundled together as LitFinder from Gale); Book Index with Reviews from EBSCOHost; ChinaDataOnline; Current Contents Connect; and CSA Worldwide Political Science Abstracts. Usage statistics for the databases and logins to retrieve these statistics were provided to the appropriate parties throughout the year as well.

Deployment of ILLIAD, the new ILL fulfillment system, has been underway for the better part of the past year. Working with Ms. Karen Williams of Interlibrary Loan and Larry Brumby, a timeline for getting ILLIAD up and running was established. Webinars detailing the setup of ILLIAD were attended. During that time, the Lending module of the system was tested and turned on. At present, the Borrowing system is all that remains to be done. Forms that fall outside the standard set have been developed, and the various web pages the ILLIAD system relies on have been developed; existing web pages will be fine-tuned as the system is fully deployed. LDAP is being used to control the authentication of users, for submitting requests and for checking on the status of ordered items by the requesting patron. The Odyssey component of ILLIAD will also be used in conjunction with the existing ARIEL system as a means of sending copies of articles out and for document delivery of requested articles by AUM patrons.

At this time, WorldCat Local has been ordered. In setting up WorldCat Local for a test period, the Voyager OPAC locations have been used to allow the WorldCat Local interface to "scrape" information regarding individual item statuses from the Voyager OPAC. In Oct. 2008, the systems librarian attended a WebEx session defining the benefits of WorldCat Local at the time. Since then, WorldCat Local has developed several new possible benefits, including the ability to offer tiers of libraries for locating items. While the tiering system is not as flexible as might at first be thought, it does provide another point of entrée to the holdings of the Montgomery Area Libraries Catalog (MALCat) holdings. In spring 2009, the self-service configuration module for WorldCat Local was made available, allowing much of the setup to be done locally rather than through the OCLC representatives. A webinar on the service configuration module was attended by the systems librarian in May, 2009. Other work needs to be done, most notably a records clean-up and reclamation project and the deployment of the promised federated searching product that is to be bundled with WorldCat Local in Summer 2009.

Goals for the upcoming year

1. Continue and conclude work on ILLIAD with Karen Williams and Larry Brumby. ILLIAD is ready for deployment at this time. However, work remains that will ensure the productivity of ILL is not impacted. While some of this involves the “on-the-fly” shakedown of the system in lieu of testing before deployment, a certain amount of tweaking the interface will need to be done, as well as correcting the various pages on the Library website regarding the procedure for logging in and placing requests. Additionally, the Voyager ILL Management interface (non-patron) will need to be maintained for access to previous year’s activity, and the Voyager ILL forms available through the OPAC will need to be updated to reflect the drop-dead date for the Voyager ILL request system. At the time the patrons are switched over to ILLIAD for placing requests, the Voyager ILL request pages will be replaced by a blank page with a link to the ILLIAD login page.
2. WorldCat Local is also expected to be a source of continued effort. While work has been done to set up WorldCat Local for a demonstration/trial period, more complete setup will need to be done to finalize the project. Among the work to be done is a re-indexing of our OPAC, such that the 035 field will be retrievable by the WorldCat Local servers and display item status information for particular holdings. Other work includes an update for our holdings, such that OCLC’s records will reflect all that is in the local OPAC, and the deletion of local holdings from OCLC for items that we no longer hold. Other projects dealing with WorldCat Local hinge upon further development of the system. A federated search product is due to roll-out in July 2009, and thus far, no open source ILS platforms are compatible with the WorldCat Local suite of tools.
3. Along with this, the MARCIVE table of content enrichment program is underway. This project is at the cost estimate stage. Once that is finalized, if the enrichment goes forward, the records that are returned as enriched will need to be loaded into the OPAC. The various rules and profiles to accomplish this task have been established already.
4. Another Voyager-oriented task that is to be investigated will be the sending of courtesy and overdue notices from Circulation. Essentially, this process should be one that will be less difficult to manage than might be thought. Because notices are e-mailed from the Voyager server, problems encountered in the past with network security on campus should be rendered moot. The most difficult task will be to get the data extracted from Banner 8 via ARGOS reporting that will include student e-mails in the proper field. This requires adaptation of the various extraction scripts currently run to create data sets for loading, and working with Dale Morris and others in Circulation in how to run these new adapted reports. Once that is accomplished, the e-mailing of notices should follow quickly.
5. EDI, while well underway for ordering, still needs to have the delivery of invoices and other data set up. Genevieve Maxwell at Baker & Taylor will be contacted about what Baker & Taylor can supply in terms of invoices, ordering, etc., and how that data can be retrieved for our use. Diane Westfall of Acquisitions is involved in this project, and will be working with the Systems Librarian to conclude that end.

6. The update of the database pages to reflect the new subject categories is underway. It is anticipated that this will involve working with Barbara Hightower and the rest of the subject liaisons to get the correct databases in each subject area, which is more or less complete at this time. Pages will have to be created working with Darryl Woods in order to finalize the project and keep the pages in the proper “look and feel” of the University Outreach approved style.

7. EZProxy will need to be upgraded, as usual. Changes will need to be made to complete the netLibrary single-login for off campus users. Other changes include the method EZProxy uses to route users to the desired database (specifically, proxy-by-port, or port-forwarding). Currently, users that have security settings at their end which prevent accessing specific ports may be blocked from our databases; work with the campus IT Services to make changes to the local DNS server to allow an alternate form of routing the users that does not indicate a specific port, instead relying on the standard http ports on the server. This method requires further investigation before being undertaken, but the results for the user should not appear drastically different.

8. Investigation of the procedures for conducting an inventory is also on the horizon. Working with Lucy Farrow, Larry Brumby, and Judy Solomon, a plan of attack is being formulated. Among the items under discussion are what is required for an inventory and open source or commercial-off-the-shelf software solutions for working with Voyager and uploading masses of barcodes to facilitate the process of inventorying the physical collection.

9. Evergreen and other open source ILS products are currently under consideration. This is a long-term project which will prepare us for the eventual abandonment of the Voyager platform. However, while this project is currently underway, and is certainly of great importance, the long-term viability of an open source solution depends upon outside factors, such as maintenance, adaptation of the platform to local needs, and the viability of both circulation and acquisition products for whichever open source ILSes are considered. It is hoped that the advent of WorldCat Local will allow some flexibility in product selection, but currently there are no open source ILSes that are listed as being compliant with WorldCat Local.

10. Online submittable purchase requests, which had gone out at the end of 2007, must be revisited. Last year, while certainly busy, there was to be an effort to port these forms from the Voyager server at Auburn running Solaris/UNIX to the Windows server we have here on the AUM campus (aumnocat.aum.edu). This adaptation will require working with Darryl Woods for the creation of the forms, and getting IT Services to allow us the permissions to e-mail these forms to the Dean of the Library. These are minor matters, but the success of the project depends on getting these forms adapted for Windows and IT Services allowing the aumnocat.aum.edu server to send e-mail.

11. Work is to begin with Dale Wynn in IT Services for implementing the Gartner.com product suite in Summer 2009.

While the previous year has been one of great effort in automation, much work remains to be done. This work is cumulative, building on efforts on the part of many people and departments, both in and out of the Library. Obviously, some projects require immediate attention, such as

maintaining and troubleshooting access, while others can be planned out, such as upgrades to various library systems or the possibility of an inventory of the Library's holdings. With any luck, some routine procedures, such as the loading of patron data in to the EZProxy authentication files, can now be automated, as has been done with the move to LDAP authentication schemes for off campus and, soon, in-house logins. It remains doubtful that this will do more than allow other projects to take precedence, although the savings in time from automating one process will allow for greater attention to others. I have attempted to make a clear and concise report of the work undertaken by the Automation department in the past year, giving credit to those members of the library and university faculty and staff whose efforts meshed with mine.

Library Web Manager Annual Report, 2008-2009

Submitted by Daryl Woods

General Statistics

<u>2008-2009</u>	<u>2007-2008</u>	<u>Percentage Change</u>
Total Hits: 3,646,529	2,220,369	+64.2%
Total Page Views: 1,434,638	1,235,638	+16.1%
Total Visitors: 288,406	235,658	+22.3%
Total Unique Visitors: 44,436	42,777	+ 3.8%

Activity Statistics

Activity by Month

April 2009 was the busiest month with 30,402 visitors.
 August 2008 was the least busy month with 18,137 visitors.
 The average visit length was 9 minutes 26 seconds.

Activity by Hour of the Day

2:00 p.m. – 2:59.p.m. was the busiest hour of the day with 18,356 visitors.
 3:00 a.m. – 3:59 a.m. was the least busy hour of the day with 5,748 visitors.

Activity by Day of the Week

Tuesdays were the busiest day of the week with 48,793 visitors.
 Saturdays were the least busy day of the week with 28,885 visitors.

Public Services Annual Report, 2008-2009

Submitted by Lucy Farrow, Head of Public Services

The Public Services Department is made up of the units in the AUM Library that have direct contact with library patrons. These units are Reference, Library Instruction, Interlibrary Loan, Government Information Services, Access Services, and Archives/Special Collections. The Public Services Department supports the mission of the AUM Library by providing access to information resources to support the curriculum and research needs of AUM's students, faculty and staff. The Public Services Department also supports lifelong learning by teaching the information literacy skills necessary to effectively locate, evaluate, and use information. The Department also assists in providing for the informational needs of the general public. The reports of each of these units are attached and are a record of the year's activities. The 2009-2010 goals of the units are found within each report.

There was an overall decrease in Reference transactions (reference questions, directional and telephone questions) as well as a 33% decrease in materials reshelved in the Reference and Periodicals area. The numbers for the Reference transactions are consistently under reported, but the decrease in the numbers of materials reshelved is partially attributable to the increase in periodicals that are available via electronic services such as JSTOR. The decrease in activity may also be due in part to fewer questions and materials used by LAMP students. The LAMP school subscribed to JSTOR for their students so they did not need to use the AUM Library resources as much as in years past. This year statistics of reference transactions were also kept at the Circulation desk. They serve as the point of first contact in the Library and act as an information center for the entire building and answered a total of 4429 questions. Adding the questions asked at both desks, the staff answered at least 17,487 inquires this reporting year.

The Library Instruction program increased by 5.9% in the total number of sessions taught while the number of students taught increased by 2.8%.

The Interlibrary Loan unit hired and trained a new staff person, Angel Smith. Overall, ILL borrowing requests decreased by 28.7 % while lending requests also decreased by 7.4 %

The Government Information Services unit continues to see changes in distribution patterns. The number of paper documents is up 21% in spite of the transition to electronic formats. The number of microfiche continues to decline and is down by another 16%. Distribution of electronic formats is up 29%. The number of reference questions has increased due to the recording of directional questions that had not been counted in previous years. This is a more accurate reflection of all the activity in the documents/legal area.

The Access Services unit circulated a total of 20,527 materials this year. This is a decrease of 1% from the previous year. The literature, history and education areas of the collection had the most use. However, the use of the nursing collection increased by 62% and the physical education collection by 51% over the previous year. The total for the use of all reserve items, including newspapers was 1,854, a 13% increase from last year. The total number of items placed on reserve was 931 items, a 12% increase. Of those 931 reserve items, 201 of these items were electronic. This is an increase in the number of electronic reserves by 13% over the

previous year. There were 1,053 uses of the electronic documents on reserve in 2008-2009; an increase of 170%.

Archives/Special Collections experienced an increase in walk-in patrons of 25%. The largest patron group continues to be undergraduates, followed by AUM faculty and members of the public. The unit added materials from University Relations, Staff Council, the Library, and the Capri Theater. Materials were also added to the Dickinson and Greenhaw collections.

Access Services Annual Report Circulation/Reserves

2008-2009

Submitted by Dr. Judy A. Solomon, Access Services Librarian

The Access Services unit supports the mission of the AUM Library by providing access to the physical information resources that support the curriculum and research needs of the AUM students, faculty and staff. The unit also assists in supplying the informational needs of the general public. The Access Services unit is located on the first floor and offers the first opportunity for patrons to ask questions concerning the library, the building, and the campus. This unit is responsible for checking out normal circulating materials as well as reserve, interlibrary loan, and universal borrowing materials. The Access Services unit provides coverage of the circulation desk during all operational hours. The unit is also responsible for the maintenance of the circulating collection, including shelving new books, re-shelving, shelf-reading, shifting, signage, and keeping the stacks in order. The unit is staffed by one librarian, Dr. Judy Solomon, three full time staff members, Dale Morris, Tom Russell, and Gwen Williams, as well as two part-time staff members, David Hamilton and Beth Rowlen, who comprise about half of one FTE. Last year the part-time staff position was almost a full-time staff position. The Friends of the AUM Library presented the Betty J. Tims Award for Outstanding Service to Tom Russell in June 2008.

This is the first year of reporting the number of patron questions Access Services answered. There were at least 751 reference questions, 3,443 directional questions, and 235 telephone questions answered from June 2008 until May 2009.

Between June 1, 2008 and May 31, 2009, a total of 20,527 materials were circulated. This is a slight decrease of 1% from the total of 20,594 materials that were circulated between June 1, 2007 and May 31, 2008. Again, the literature, history and education areas of the collection had the most use. However, the use of the nursing collection increased 62% and the use of the physical education collection increased 51%. The total use of traditional reserves items, including newspapers, was 1,854; a 16% increase over the prior year. The total number of items placed on reserves was 931, including 201 electronic reserves items; a 13% increase in the number of electronic reserves items over the prior year. During 2008-2009, there were 1,053 uses; a 170% increase in the use of the electronic reserves documents over the previous year.

The circulation pattern of the users groups changed during 2008-2009. The circulation of materials increased in the following user groups: AUM Graduate students checked out 15% more, AUM Faculty checked out 10% more, Auburn Graduate students checked out 56% more, Community users checked out 11% more, Consortia users checked out 20% more, and the Auburn Staff checked out 123% more than the prior year. Circulation decreased in the following user groups: AUM Alumni checked out 58% less, AUM Undergraduates checked out 3% less, Auburn Faculty checked out 15% less, Auburn Undergraduates checked out 53 % less, and the AUM Staff checked out 32% less. The downsizing of AUM staff members might have contributed to the decrease in items checked out by AUM staff. There were 2,476 K-12 users who registered at the circulation desk. This is almost the same number as the prior year. It is highly likely that the number of registered students is under reported. Some students are unaware that they are required to register and others do not feel it is necessary.

Total monies collected at circulation were \$10,269.14; a decrease of 15% from the previous year. This total includes book and material replacement, fines, guest cards and interlibrary loan charges. However, there was a 10% increase in the number of guest cards purchased over the prior year.

See attached pages for complete circulation statistics.

Goals 2009-2010:

1. Shift the circulation collection on floors 3-6.
2. Investigate the feasibility of an inventory project and work with Tim Bailey in Automation to determine a software recommendation.
3. Move toward paperless overdue notices if possible.

Archives & Special Collections

Annual Report

June 1, 2008 - May 30, 2009

Submitted by:

Jason Kneip,

Archives & Special Collections Librarian

Introduction:

The Archives & Special Collections unit serves the University community in the preservation and administration of institutional records and manuscript collections. The unit's primary responsibility is to document the history of the University and to facilitate access of source material for administrators, faculty, students, and alumni.

The unit is located in room 804 of the Library Tower. The hours of operation are Monday-Friday from 8am until 5:30pm. Hours of operation may vary due to staff scheduling for desk shifts and other duties. The unit consists of one full-time librarian and one full-time library assistant.

Collection Size and Growth:

Special Collections holds just over 6,000 items which have been cataloged in Voyager. During the past year, Special Collections added 62 new titles during the past year. The University Archives & Manuscripts section currently holds approximately 750 cubic feet of records. The following materials represent the most substantial accessions over the past year:

- 73 compact discs containing digital photographs & newspaper clippings from University Relations, and approx. 5 cubic feet of promotional materials and documentation from various campus event coordinated by the Unit.
- 5 cubic feet of materials from Staff Council.
- 10 cubic feet of materials from the Library (Dean's files, purchase orders & travel vouchers).
- 67 audio cassettes and 12 reel-to-reel tapes of interviews with Cong. Dickinson dated between 1979-1991.
- 5 cubic feet of materials from the Capri Theater.
- 5 cubic feet of materials from Wayne Greenhaw to be added to the existing collection.

During the past year, Archives & Special Collections has started to archive web pages created by University departments, offices, and sponsored organizations using the open source web harvesting software WinHTTrack. Below is a selection of the web sites that have been archived: issues of The Aumnibus created during the past year, copies of the AUM News distributed via email, and minutes from University committees (SACS accreditation web site, Core Curriculum Committee, Faculty Senate, Staff Council).

Physical Environment and Conditions:

The department has not added or gained any additional storage space in the past year. The staff continues to strive for the most desirable environmental conditions in the unit through the following methods: running our HEPA air filter several times a week, vacuuming floors with the Rainbow vacuum on a bi-monthly basis, and running our dehumidifiers when necessary.

The Archives & Special Collections staff also conducts humidity readings for other areas of the Library. Please see **Table G** for Temperature and Relative Humidity Readings Reports for the past year.

Records Management Activities:

The Archives and Special Collections Librarian also continues to serve as the University Liaison to the State Records Commission concerning matters of records management. There have not been any changes to the Records Disposition Authority during the past year.

The records disposition statistics for the past year are as follows:

- Total number of Records Disposition forms approved: 12
- Volume of records approved for destruction: 364.50 cu. ft.

Please see **Table F** for further information on records management activities for the past year.

Projects:

- Archives and Special Collections created a small book exhibition and prepared a Power Point presentation for the second annual Friends of the AUM Library Dean's Dinner (May).
- Archives and Special Collections has been working with Technical Services to implement CONTENTdm both for the State Publications & Records Task Force project and the Quick Start hosted instance of CONTENTdm.
- The Archives and Special Collections staff added additional photographs from library events to the photograph sharing web site Flickr.
- Samantha once again worked with students of Dr. Gribben's English course to teach about the basic of book repair.
- Samantha created an exhibit for the second floor display cases to commemorate Black History Month.

Usage Statistics:

The number of walk-in visitors to Archives and Special Collections during 2008-09 was 101. This figure is up from 2007-08 during which there were 76 visitors. Our largest patron group continues to be undergraduate students, followed by AUM faculty and members of the public, who use our facilities at nearly an equal ratio. A detailed report of statistics in the aforementioned areas can be found at the end of this report.

Goals for 2009-2010

- Using CONTENTdm, build our digital library holdings by adding digitized materials from the following collections: the Montgomery Summer Seminar of the Arts Collection, Lella Warren Papers, Cong. Wm. L. Dickinson Collection, and historical images of AUM.
- Continue to experiment with open-source software packages Archon and the Archivists Toolkit in order to create a database of our archival holdings which can also be accessed online by our patrons.
- Process two congressional sessions of the Dickinson Papers dating from the 1980s.
- Consolidate the holdings of the Archives (i.e., shred University records that no longer need to be held) and shift boxes to determine how much free space remains.

**GOVERNMENT INFORMATION SERVICES
Annual Report 2008-2009**

The Government Information Services unit supports the mission of the AUM Library by providing access to governmental and legal information resources that support the curriculum and research needs of the AUM community and the public at large. The unit has been short-staffed due to the freezing of the Document's Librarian position as of January 2008. Lucy Farrow continues to keep the basic librarian responsibilities of the Regional and Depository going while Lynn Ferguson and Cheryl Meehan keep the day to day processing and services going. One student assistant is employed, working 20 hours a week.

The number of paper items received is up 21% in spite of the turn to electronic formats. According to GPO, 95% of new titles published are electronic format. The number of items received in fiche continues to decline and is down 16% from the previous year. As the microfiche contracts expire, GPO is transitioning the publications to an electronic format. The number of electronic items (CD's) is up by 29% but the electronic shipments continue to vary greatly from year to year. This year a major weeding project was also undertaken. As a regional depository AUM is required to keep the depository items it has received, however, duplicates may be discarded. This year 5,483 duplicate items were discarded. These were primarily paper

copies of hearings that were also available in microfiche and a PDF electronic copy. The ongoing weeding project will help control the growth of the documents paper collection.

The reference statistics are up this year. Some of the questions are general reference questions about databases and not strictly government documents reference and some are students who have questions on specific assignments. This year for the first time directional and informational questions were also included in the count raising the count considerably. Many of the documents and legal questions are the result of specific classes.

During the past year 4117 weekly cataloging records were added to the catalog and edited by the staff. This is up by about 39 % from the previous year. The count does not reflect the items not included in the catalog or the serials checked in such as *Federal Register* or *Congressional Record*. Those records must also be edited to add new issues. During this year, a total of 20,098 bibliographic records for documents were reviewed and edited. This reflects an increase of 73% over the preceding year. The increase in records is partially attributable to the change in cataloging practices at GPO and their push to do retrospective cataloging of some items. The processing of the monthly Marcive records is being kept up to date despite an increase in the number of those records as well.

The documents librarian, as the Regional Librarian, also provides services to the selective depository libraries in the area. These services range from advice on retention of documents to proper disposal procedures to discussions on dropping depository status. There were approximately 80 email contacts this year, some of which were short disposal lists. The past year approximately 43 disposal lists were checked and several excellent titles brought into our collection. The unit also hosted a state wide meeting of depository librarians in December 2008. Mr. Tim Byrne of the Office of Scientific and Technical Information did an excellent presentation on technical literature. This program was in support of the regional responsibilities to offer training and workshops to the selective depository librarians and staff.

2003/2004	5865	3967	372
2002/2003	7670	6827	333

Goals for 2009-2010 are:

1. Investigate a shared depository arrangement with Auburn University for the map collection and implement the arrangement if possible.

Interlibrary loan annual report 2008-2009

Submitted by Karen Williams, Interlibrary Loan Librarian

The Interlibrary Loan unit supports the mission of the AUM Library by providing access to resources to support the curriculum and research needs of AUM's students, faculty and staff. Specifically, ILL provides access to materials not held within the collections of the AUM Library and is a critical support to the research needs of the AUM faculty.

The ILL unit was staffed by Karen Williams, Angelina Smith (from July to May), and one 20-hr student assistant.

Due to the abrupt departure of the ILL associate in May 2008, and the subsequent hiring and training of a new associate, ILLIAD for Borrowing has not been installed. It is hoped that this will be ready by Fall 2009.

This past year, interlibrary loan borrowing requests decreased, with 1059 transactions this year compared to 1485 transaction in 2007-2008, a decrease of 28.7 percent. Lending transactions decreased from 2154 items lent in 2007-2008 to 1994 items lent in 2008-2009, a decrease of 7.4 percent.

AUM provided 376 copies of articles to NAAL libraries last year and loaned 750 books, for a total of 1126 lending transactions, which was almost the same as the previous year. Borrowing decreased with 368 original items and 190 copies from NAAL members totaling 558 borrowing transactions, a decrease of 20.6 percent. AUM borrowed 52.7 percent of requested materials from NAAL members during 2008-09, an increase of 5.4 percent. Materials loaned to NAAL members increased from 52.5 percent in 2007-08 to 56.5 percent this past year.

Unfilled lending transactions (where the AUM library could not supply materials to another library) increased by 19.4 percent.

There were 188 refusals by the ILL unit in the past year. Refusals occurred when AUM already owned the requested item or policies prevented the department from making the request.

However, of the 188 refusals, 136 were filled "in house," mainly through AUM library's holdings or full-text databases.

The average turn-around time to fill lending requests for both copies and loans remained at under one day with the turn-around time for copies at 5.85 hours and the turn-around time for loans at 6.32 hours. The average turn-around time for borrowing requests decreased from 3.9 days to 3.7 days for copies and decreased from 7.3 days to 6.9 days for loans. (These statistics also include requests that were filled "in-house")

AUM faculty generated the largest number of requests with a total of 328 copies and 461 loans. Undergraduates requested 37 copies and 86 loans. Graduate students requested 43 copies and 94 loans, and staff requested 3 copies and 160 loans. (These statistics also include requests that were filled "in-house".)

The top five departments with the highest number of interlibrary loan requests for the past year were: History –394; English – 212; Biology - 150; Library - 88; and Administration - 56. These statistics also include requests that were filled "in-house."

Universal Borrowing/ALLIES

In the past year, AUM filled 78 requests through UB and charged out approximately 175 items to “walk-in” UB patrons. In addition, AUM patrons requested 340 items via UB and checked out 554 items. There were approximately 11 requests that were unfilled, which means that there were 225 items that AUM patrons checked out at another UB library.

Goals 2009-2010:

1. Fully implement ILLIAD.
2. Evaluate and troubleshoot the ILLIAD software and procedures related to implementation.
3. Train library staff on new software.
4. Offer training sessions for AUM faculty on new software features.

Library Instruction Annual Report 2008-2009

Submitted by Barbara Hightower, Instruction Librarian

The Library Instruction supports the mission of the Library by facilitating lifelong learning within the AUM community by teaching the information literacy skills necessary to effectively locate, evaluate, and use information.

The Library Instruction program grew this year in both the number of sessions and the number of students attending those sessions. Student attendance at instruction sessions increased by 5.9%, and the total number of sessions increased by 2.8% over academic year 2007-2008 (see table below).

Library Instruction Sessions & Number of Students Attending

2008-2009 Compared with 2006-2007 and 2007-2008

Month	Instruction Sessions 2006-2007	Instruction Sessions 2007-2008	Instruction Sessions 2008-2009	Students 2006-2007	Students 2007-2008	Students 2008-2009

We saw a small increase in the number of English Composition courses (see table below). At the beginning of the Fall semester, the Library Instruction Coordinator spoke at a meeting of the English composition adjunct faculty, and Dr. Alan Gribben head of the Department of English and Philosophy urged that faculty request library instruction for their sections of ENGL1010 and ENGL1020. We are currently at almost 100% participation with the composition courses.

Library Instruction Session for English Composition Courses

Totals	32	33	36	22	37	40

Library Instruction for Seamless Admission students on the Auburn campus added to the number of English composition courses and students. Amanda Morris was hired to teach these sessions beginning with the Fall 2008 semester. A total of 107 attendances were recorded for six sessions, three in October and three in November, for ENGL1010. Two sections met for two library instruction sessions each. Approximately 126 attendances were recorded for 6 sessions for ENGL1020 during the Spring 2009 semester. Two sections met twice during this semester.

Librarians conducted the majority of sessions in the Library's computer lab but went elsewhere on campus including the Schools of Business and Nursing. The Library Instruction Coordinator also communicated with students in the NURS3831: Computers in Nursing course through Blackboard email and conducted instruction sessions for these students via Wimba Live Classroom. This is the third year these online tools have been used with NURS3831.

In addition to instruction sessions for individual courses, librarians and library staff participated in activities outside the Library. We spoke at the New Graduate Student Orientation in August and the New Faculty Orientation in September. The Library Instruction Coordinator coordinated the Library's table at the New Student Orientation where librarians and staff spoke to new students and their parents and showcased browsing books and videos/DVDs from the Library's collections.

We began a new library instruction format for the AUM Success courses. The Library Sleuth exercise based on Auburn's first year library instruction assignment requires the students to explore assigned areas of the library in small groups and then report to the class on their findings.

Assessment of student learning outcomes is being planned for an increased number of sessions, specifically in Business Cornerstone and NURS3831 courses. We will increase assessment by 5% for the coming year.

Next year's goals include:

- Create online materials that can be used for courses taught on campus and online. The assessment of this goal is whether or not these materials are created.
- Develop instructional materials that can be used to better integrate information literacy skills into library instruction sessions, especially for English Composition and Nursing courses. The assessment of this goal is whether or not these materials are created.
- Increase by 5% the assessment of student learning outcomes of library instruction sessions. The assessment of this goal is whether or not the assessment is completed.

Technical Services Department

Annual Report

June 1, 2008—May 31, 2009

Submitted by

Colleen Valente

Head of Technical Services

June 25, 2009

Staff

John Gantt, Cataloging Librarian

Diane Westfall, Library Associate

Michelle Scott, Library Assistant

Anne Vance, Library Associate

Student Assistants

Tabitha Singleton

Anita Griffith

I. Mission

Technical Services is comprised of three units; Acquisitions, Serials Acquisitions and Cataloging. The department actively supports the educational mission of the Library and the University community by acquiring monographic, serial and electronic resources and by building and maintaining a catalog that provides accurate and up-to-date information about the universe of resources, both in the library and online, available to the AUM community. We create records for the materials we acquire and classify them in order to make those materials accessible. The Department is responsible for the ongoing maintenance and quality control of the information in the catalog. Our goal is to ensure that it facilitates the identification and retrieval of materials which support the scholarly, educational and personal needs of the AUM community.

II. Staff

There were no staff changes this year.

III. Statistical highlights

Acquisitions: The trend of acquiring fewer and fewer titles continues. Acquisitions staff ordered 3,617 new titles this last year, which includes 62 videos. This represents a decrease of 1,038 titles over last year (4755) or a decrease of nearly 24%. For the first time this year, we have broken out gift statistics into categories. We received: 546 hard bound books; 622 soft cover books; 2693 periodical issues and 13 non book items for a total of 3874 items which is a small increase (263) over the number received last year (3611). We also added access to 56 electronic state publications through our catalog.

The unit received 4,289 items (4,208 books, 78 videos and 3 CD-ROMS).

Cataloging: Cataloging staff added 4,240 titles to the catalog, a decrease of 27.6% which continues the downward trend noted last year, when we added 5,858 new titles to the catalog. This figure includes print, av, periodicals and electronic titles added as part of the NAAL project.

The number of added volumes and copies has decreased, as well. Last year 625 volumes were added to the collection. This year we added 415-- a decrease of 33.6% Last year 45 copies of items in the collection were added; this year we only added 12 copies or nearly 70% fewer.

The number of books being weeded continues to decline as the original large project has been virtually completed and we resume normal ongoing collection maintenance. This year 3,276 print titles were withdrawn. Last year 8,217 titles were withdrawn. In addition to print titles, we also withdrew 170 av items.

IV. Projects:

The single biggest project undertaken was the NAAL state documents project. This required a substantial portion of my time and resulted in my cataloging and archiving nearly all the 56 titles archived. Most of the original cataloging required was of monographic items (12 of 16 titles). These are now available through our catalog, Alabama Mosaic or via WorldCat. .

V. Staff Activities

- Diane attended a two day workshop "Just for Copy-Cats" which firmed up her cataloging skills. She attended a customer service session offered by the university: "Email & Telephone Strategies for Effective Communication". With the retirement of Louise Redd, she has had to take over the bulk of the work Louise did with regard to new books—printing labels and updating OCLC holdings.
- Anne attended the Voyager Users' Group meeting last November. She was a member of the Strategic Planning Committee, and also attended diversity training and two customer service training sessions.

- John continues to represent the library on the Faculty Senate. He was also elected to the position of Moderator-elect for the TSSRT Round Table. He has taken on new tasks by absorbing some of the work that Louise did, e.g. he keeps the monthly statistics and is responsible for adding new volumes of old titles to the collection. He also attended two customer service sessions.
- In addition to several Human Resources training sessions of one sort or another, I participated in a number of Contentdm related webinars during the year. I also attended an all day preconference meeting on RDA prior to ALLA.
